## Introduction

Oink allows a child or teenager to transact online using a digital allowance without having to provide any personally identifiable information. Parent account holders set up an account for themselves in Oink and associate one or more payment methods to fund transactions made by their child accounts. Oink currently supports credit cards and PayPal as funding mechanisms.

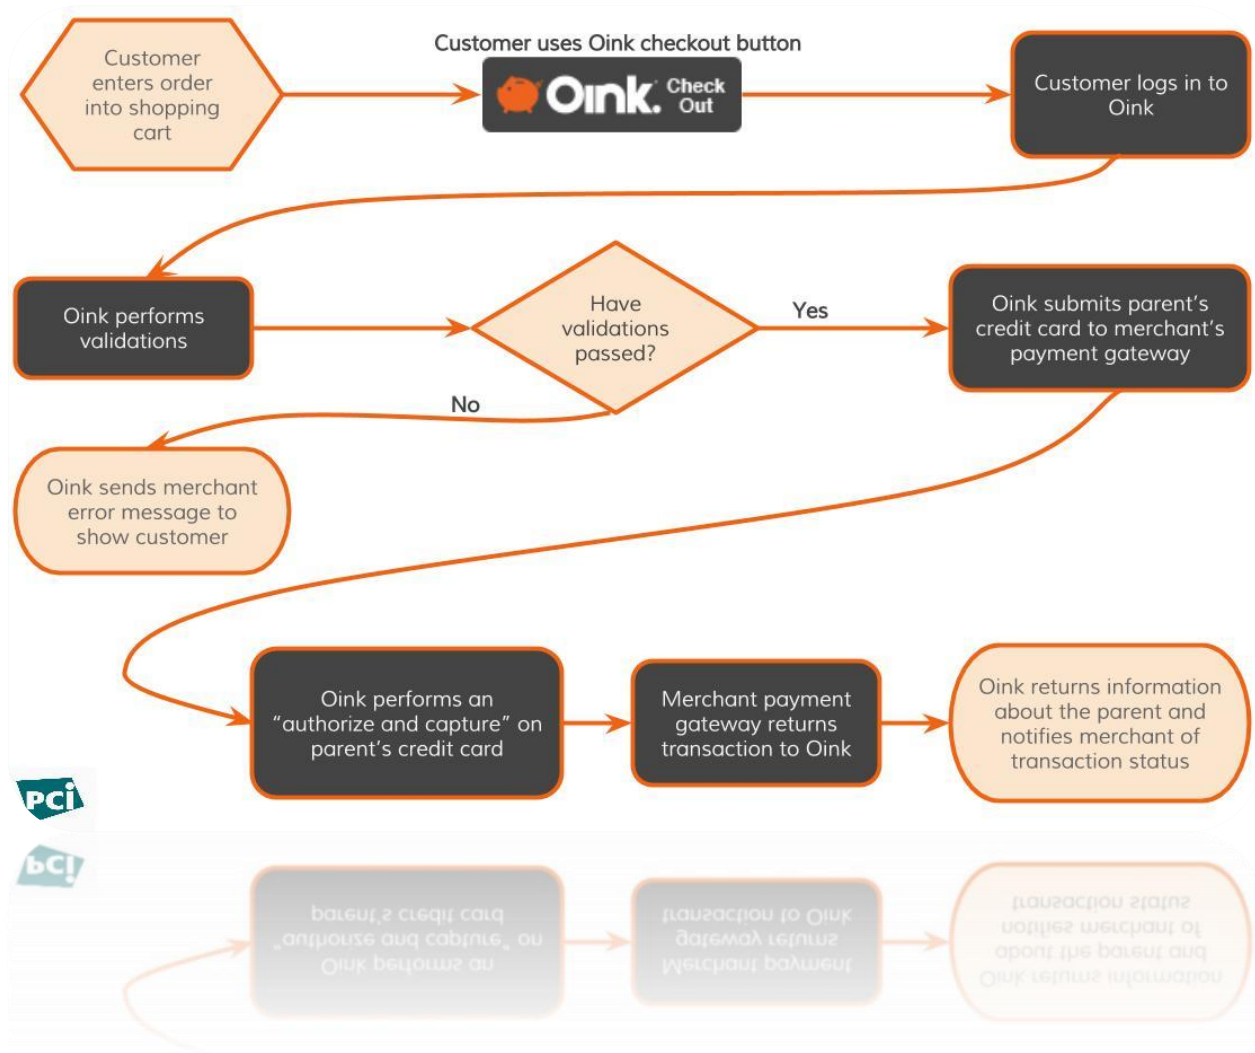

Parent account holders set up profiles for their child accounts; and can set rules such as a monthly allowance, spending limits, approval rules; and provide details such as account holder gender and age. Based on this information, Oink curates a list of age appropriate merchants for the child account holder to shop at.

Account holders checkout using the Oink checkout button on merchant sites. Oink determines if the account holder is allowed to transact at the merchant and if any limits are being violated. If no limits are violated, Oink charges the parent account holder and pays the merchant by transacting with the merchants payment gateway. The merchant is also provided information about the parent account holder such as name, address and email.

For more details on how Oink works please visit our website:

## Typical Transaction Flow

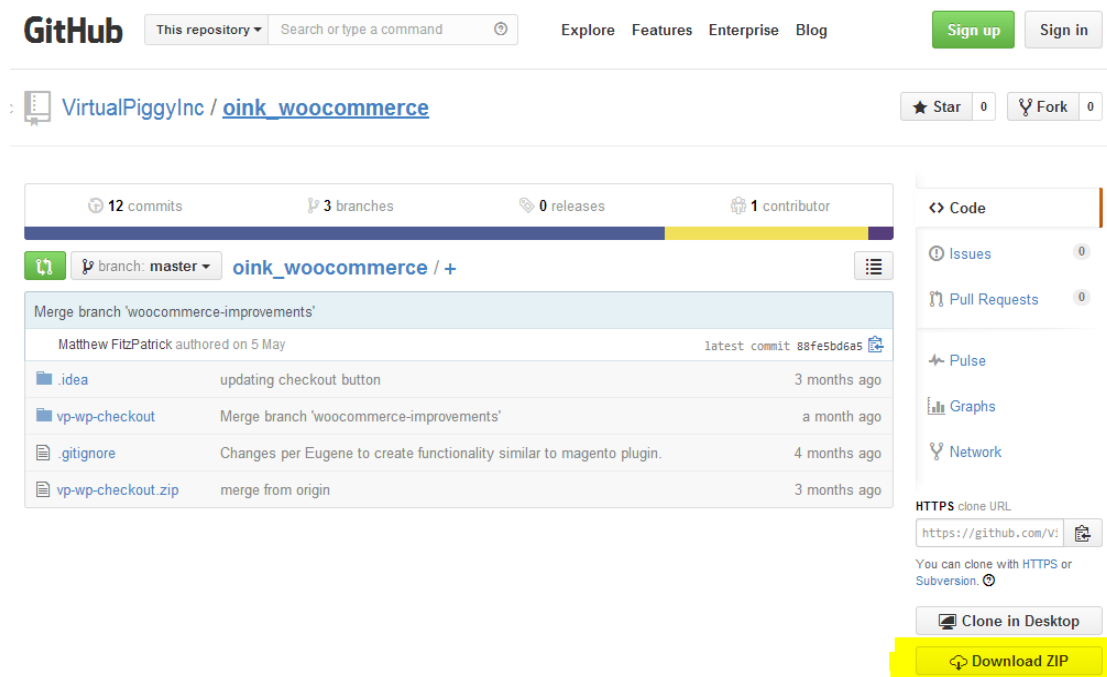

# System Requirements

- WordPress 3.7+
- WooCommerce 2.1+
- JQuery 1.6+

# Installation

## Step 1

Download the Oink WooCommerce plugin.

## Step 2

In the WordPress admin panel, navigate to the plugins page and select 'upload' located above the search bar.

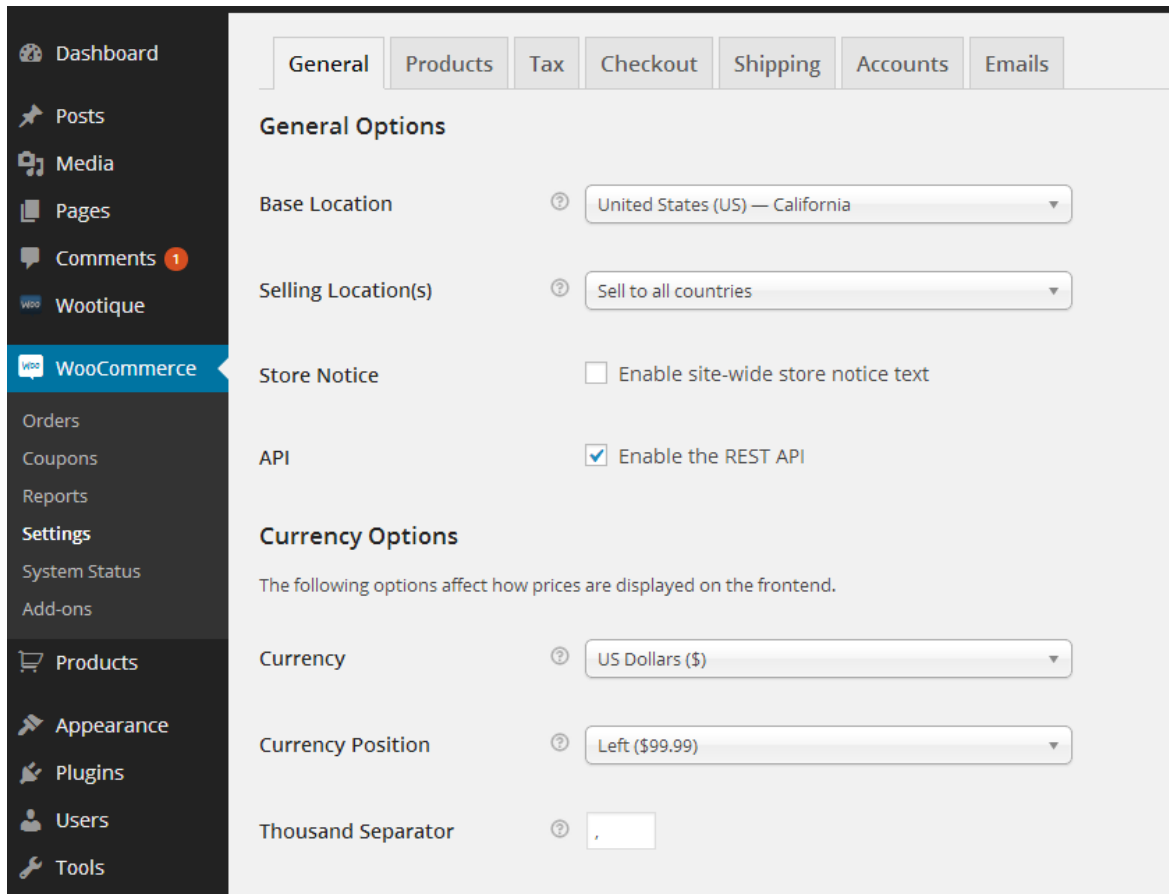

## Step 3

Click 'Choose File', navigate to the zipped Oink plugin, select it, and click "Install Now".

# Configuration

## Step 1

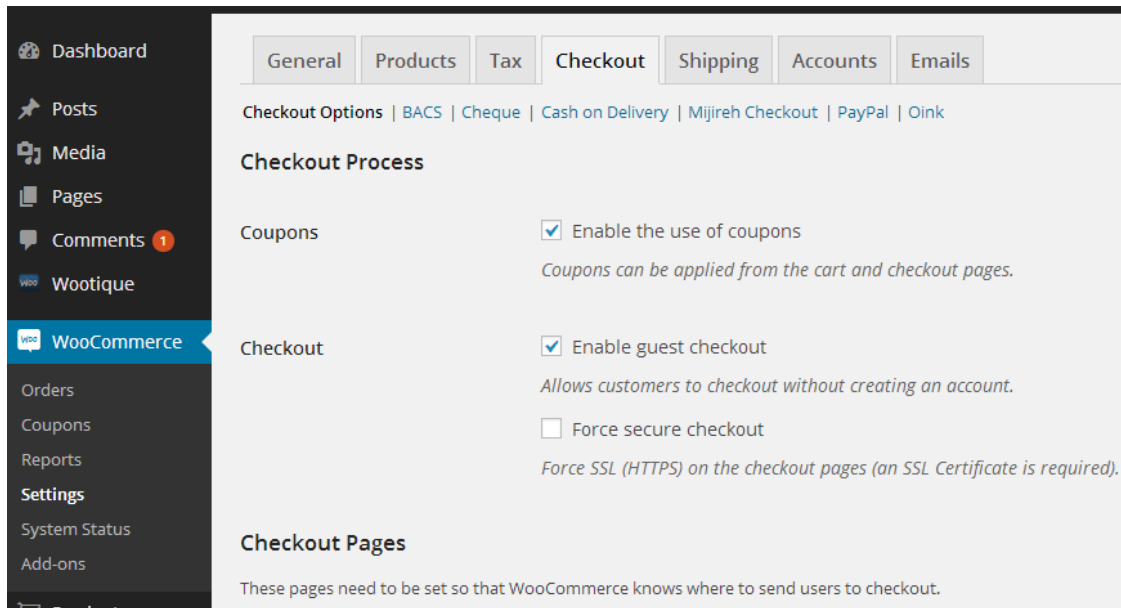

Open the admin panel, and from the right sidebar menu navigate to WooCommerce > Settings.

The screenshot shows the WordPress admin panel with the WooCommerce settings page. The left sidebar has a dark background with white text. The 'WooCommerce' menu item is highlighted with a blue bar. The main content area has a light gray background and a top navigation bar with tabs for General, Products, Tax, Checkout, Shipping, Accounts, and Emails. The 'General' tab is active. Under 'General Options', there are settings for Base Location (set to 'United States (US) — California'), Selling Location(s) (set to 'Sell to all countries'), Store Notice (with an unchecked checkbox for 'Enable site-wide store notice text'), and API (with a checked checkbox for 'Enable the REST API'). Below this is the 'Currency Options' section, which includes a note: 'The following options affect how prices are displayed on the frontend.' The settings are: Currency (set to 'US Dollars (\$)'), Currency Position (set to 'Left (\$99.99)'), and Thousand Separator (set to ',').

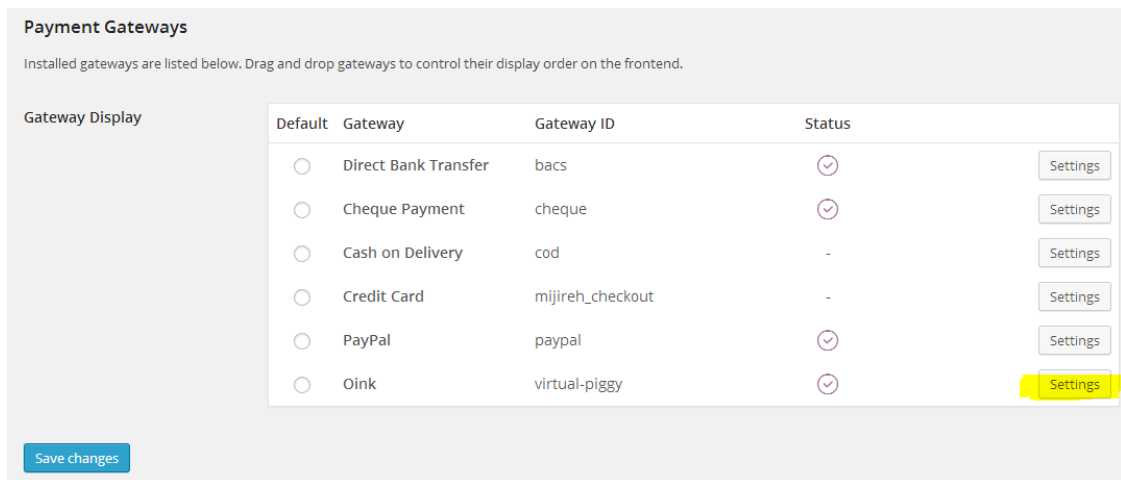

## Step 2

Within the WooCommerce settings page, select 'Checkout' on the top navigation bar.

## Step 3

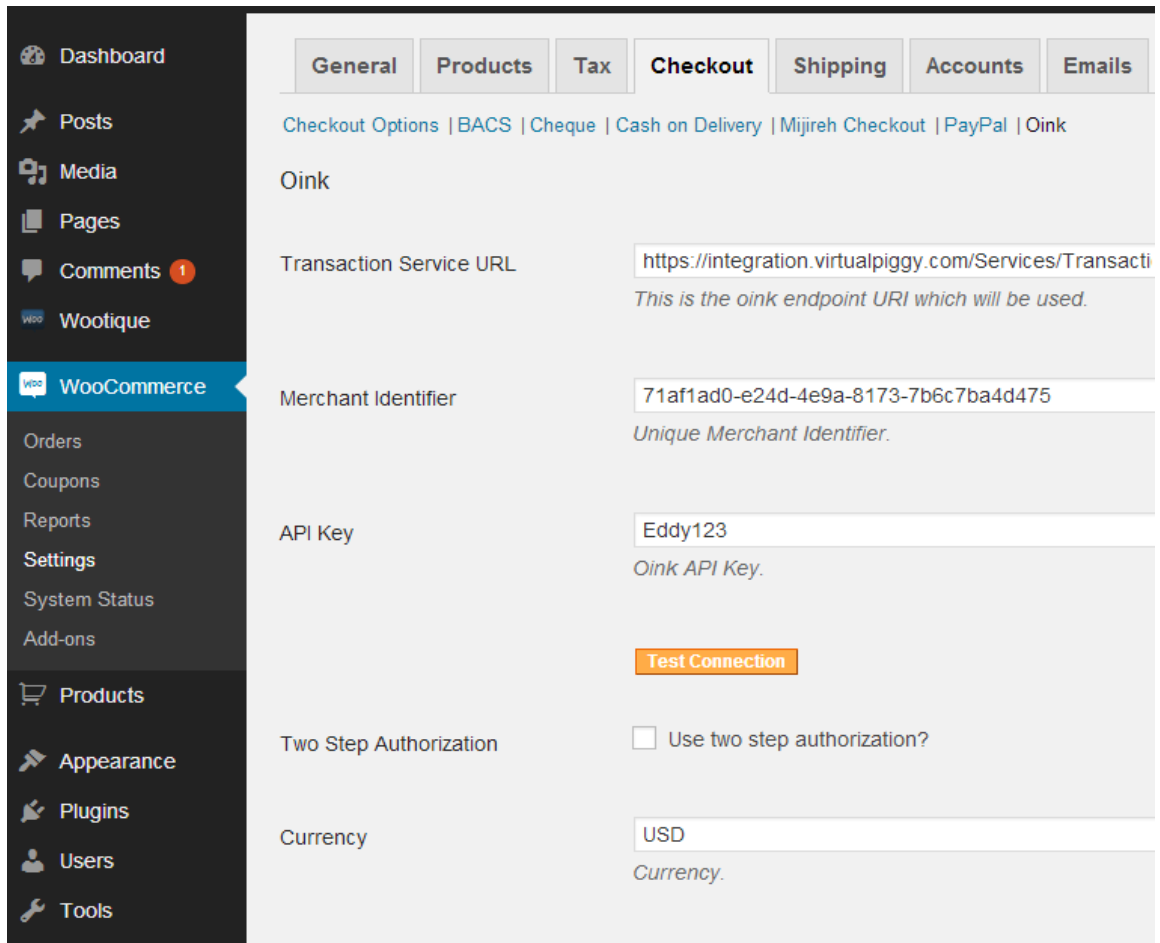

Scroll down to the Payment Gateways section, and select Oink settings.

## Step 4

Enter the merchant information provided to you by the [Oink integration team](#).

	General	Products	Tax	Checkout	Shipping	Accounts	Emails
	<a href="#">Checkout Options</a>   <a href="#">BACS</a>   <a href="#">Cheque</a>   <a href="#">Cash on Delivery</a>   <a href="#">Mijireh Checkout</a>   <a href="#">PayPal</a>   <a href="#">Oink</a>						
	Oink						
Transaction Service URL	<input type="text" value="https://integration.virtualpiggy.com/Services/Transacti"/> <i>This is the oink endpoint URI which will be used.</i>						
Merchant Identifier	<input type="text" value="71af1ad0-e24d-4e9a-8173-7b6c7ba4d475"/> <i>Unique Merchant Identifier.</i>
