Introduction

Oink allows a child or teenager to transact online using a digital allowance without having to provide any personally identifiable information. Parent account holders set up an account for themselves in Oink and associate one or more payment methods to fund transactions made by their child accounts. Oink currently supports credit cards and PayPal as funding mechanisms.

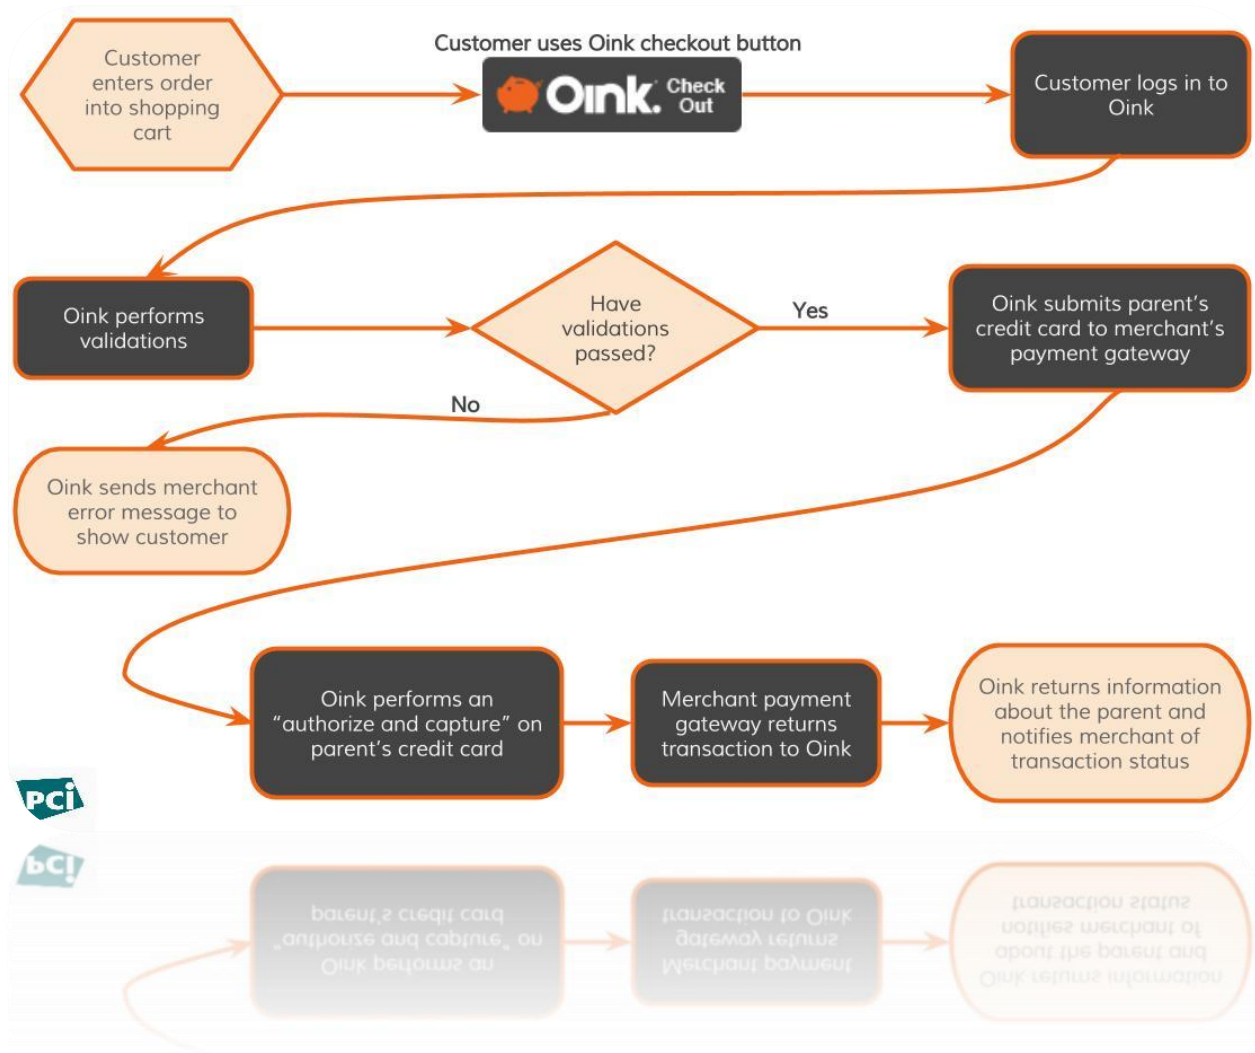

Parent account holders set up profiles for their child accounts; and can set rules such as a monthly allowance, spending limits, approval rules; and provide details such as account holder gender and age. Based on this information, Oink curates a list of age appropriate merchants for the child account holder to shop at.

Account holders checkout using the Oink checkout button on merchant sites. Oink determines if the account holder is allowed to transact at the merchant and if any limits are being violated. If no limits are violated, Oink charges the parent account holder and pays the merchant by transacting with the merchants payment gateway. The merchant is also provided information about the parent account holder such as name, address and email.

For more details on how Oink works please visit our website:

Clone in Desktop

Download ZIP

Step 2

In the WordPress admin panel, navigate to the plugins page and select 'upload' located above the search bar.

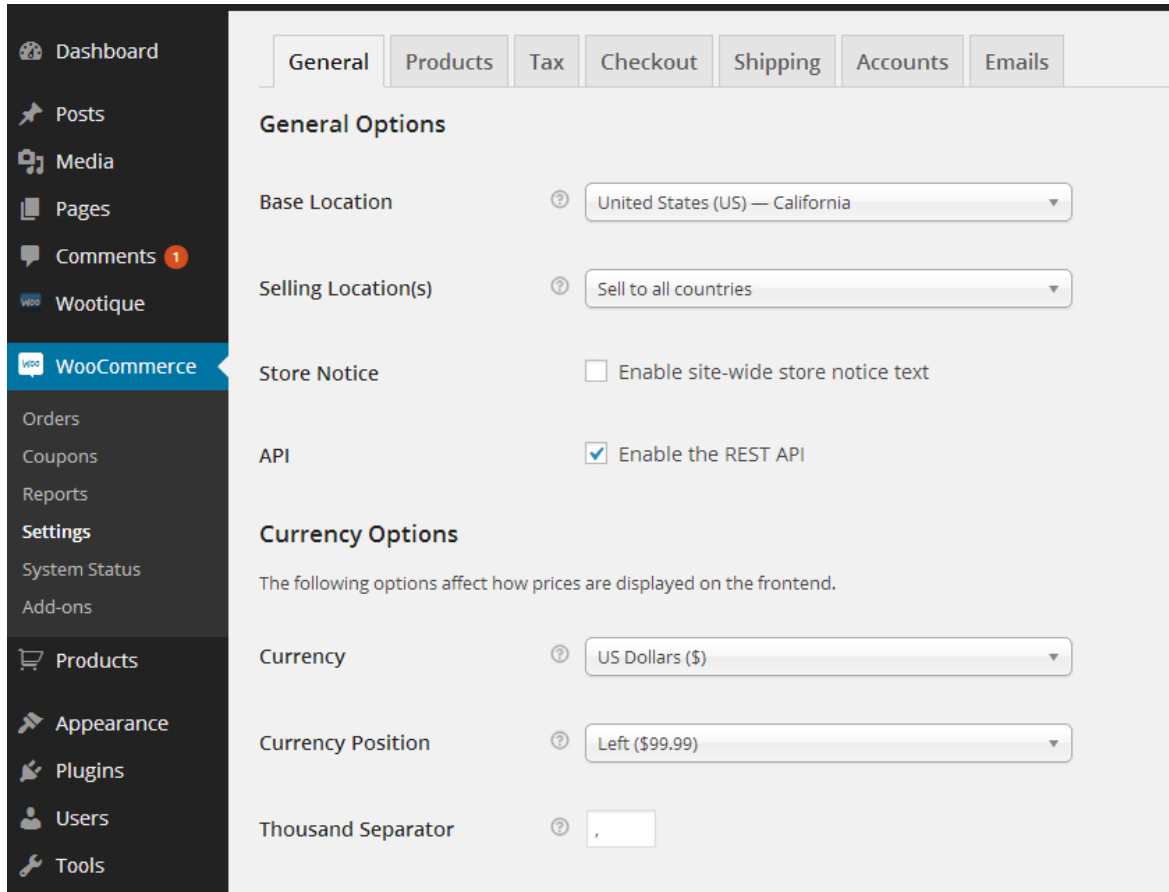

Step 3

Navigate to the zipped Oink plugin location, select it, and click "Install Now".

Configuration

Step 1

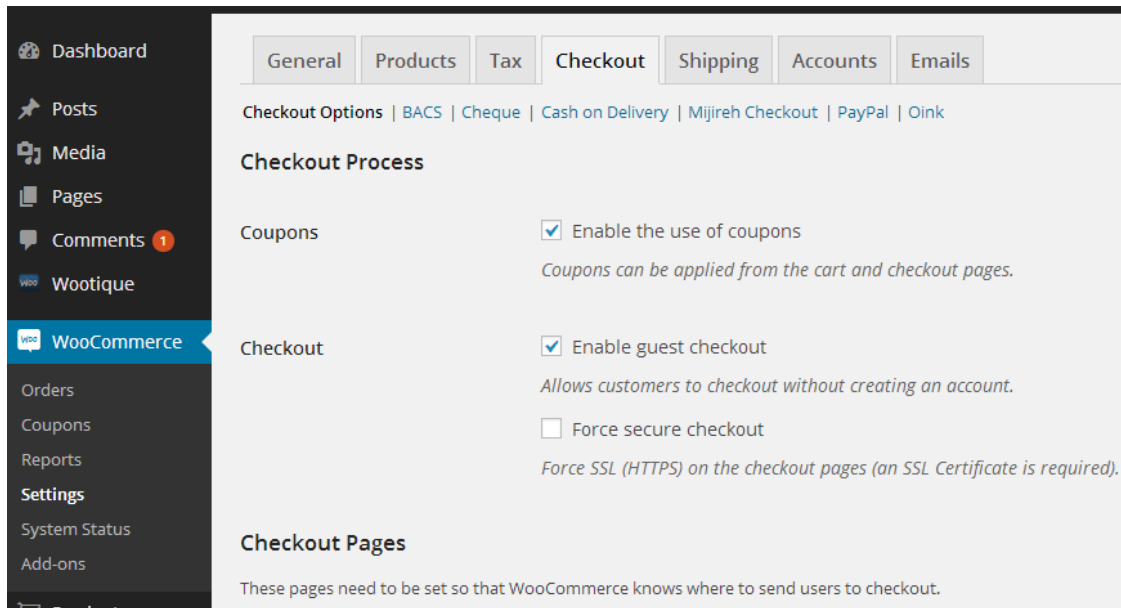

Open the admin panel, and from the right sidebar menu navigate to WooCommerce > Settings.

The screenshot displays the WooCommerce Settings interface. The left sidebar contains a navigation menu with the following items: Dashboard, Posts, Media, Pages, Comments (1), Wootique, **WooCommerce**, Orders, Coupons, Reports, Settings, System Status, Add-ons, Products, Appearance, Plugins, Users, and Tools. The 'WooCommerce' menu item is highlighted, and its sub-menu is expanded, showing 'Orders', 'Coupons', 'Reports', 'Settings', 'System Status', 'Add-ons', 'Products', 'Appearance', 'Plugins', 'Users', and 'Tools'. The 'Settings' item is selected, leading to the 'General' tab of the settings page. The 'General' tab is active, and the 'General Options' section is visible. The 'Base Location' is set to 'United States (US) — California', 'Selling Location(s)' is set to 'Sell to all countries', 'Store Notice' is disabled, and 'API' is enabled. The 'Currency Options' section is also visible, showing 'Currency' set to 'US Dollars (\$)', 'Currency Position' set to 'Left (\$99.99)', and 'Thousand Separator' set to a comma.

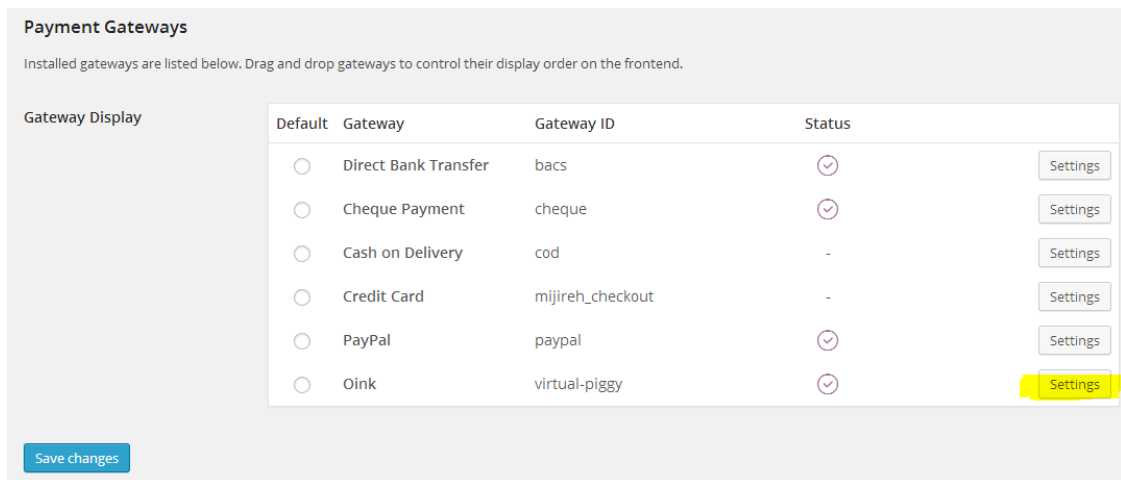

Step 2

Within the WooCommerce settings page, select 'Checkout' on the top navigation bar.

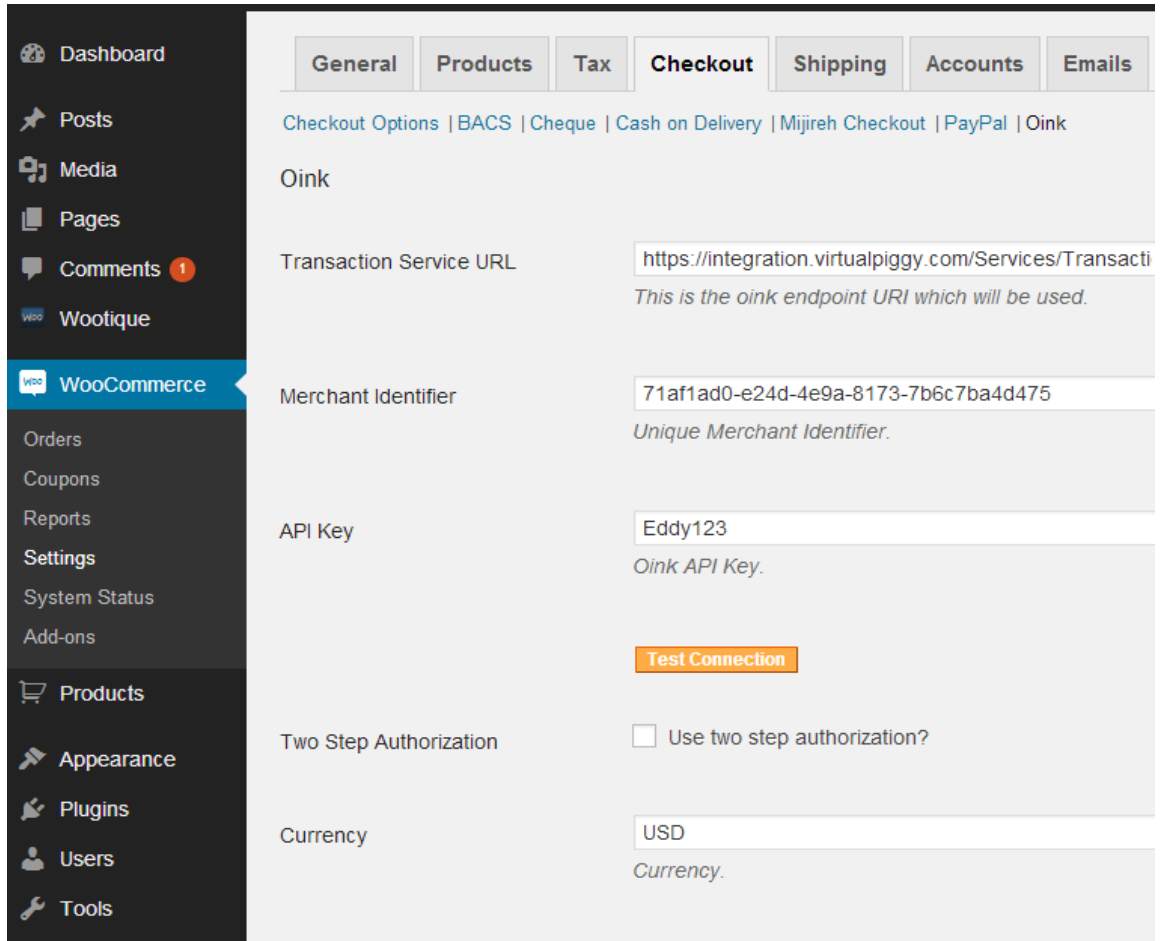

Step 3

Scroll down to the Payment Gateways section, and select Oink settings.

Step 4

Enter the merchant information provided to you by the [Oink integration team](#).

The screenshot shows the WooCommerce Settings interface with the 'Checkout' tab selected. The left sidebar contains navigation links: Dashboard, Posts, Media, Pages, Comments (1), Wootique, WooCommerce (selected), Orders, Coupons, Reports, Settings, System Status, Add-ons, Products, Appearance, Plugins, Users, and Tools. The main content area has tabs for General, Products, Tax, Checkout (active), Shipping, Accounts, and Emails. Under the 'Checkout' tab, there are links for Checkout Options, BACS, Cheque, Cash on Delivery, Mijireh Checkout, PayPal, and Oink. The Oink section contains the following fields:

- Transaction Service URL:** *This is the oink endpoint URI which will be used.*
- Merchant Identifier:** *Unique Merchant Identifier.*
- API Key:** *Oink API Key.*
- Test Connection:**
- Two Step Authorization:** ☐ Use two step authorization?
- Currency:** *Currency.*

Step 5

When you have finished entering your configuration settings, select 'Save changes' at the bottom of the Oink settings page.

Show payment method for	<div>All Users ▼</div> <p><i>Which users see oink as a checkout option?</i></p>
